Summary

Enteral nutrition infusion pump is a kind of equipment specially designed for enteral nutrition support.

Usage principle

- (1) When enteral nutrition is carried out by tube feeding, a special infusion pump is recommended.
- (2) The special enteral nutrition infusion pump should be used for enteral nutrition infusion instead of other infusion pumps.
- (3) The design and function of the infusion pump vary from company to company and should be operated according to the instructions.
- (4) Users of infusion pumps should receive special training before they are qualified.
